There is some minor editing we are doing with the testimony. I will share it with you when that is done.

Yes that could help us get ready for June. Why are you not going in April?

Jeff,

While I am concerned that "testifying later" may be "too late", there is a very strong likelihood we will not be testifying next week but will be at the June meeting which is an unanticipated switch for us. I will let you know what happens. Would you like to see our draft testimony? It is close to being completed.

Alan

I advised Kim that we could wait and testify later. He did mention the need not to undermine the CZARA discussions by advocating anything different in this venue than that venue but I am sure you are thinking about that as well.

Jeff,

We are planning to testify. Tony Barber, the OOO director, and I are going to Sunriver the night before (Tuesday). Our testimony will focus on what we believe is needed to protect water quality and beneficial uses not what the draft rule will say because we do not know what will be in the draft rule. My understanding is that the ODF staff will be presenting information on the "materials and methods" and possible options for the rule.

What about you all? Are you planning to go?

Alan

Is EPA planning on testifying? There isn't a proposed rule to testify on yet, right?
